

## DISCHARGE SUMMARY

Ashcroft General Hospital - General Surgery

Patient: Tomas Berg  
Date of birth: 1979-04-23  
Hospital number: AG-772104  
Date admitted: 2026-01-08  
Date discharged: 2026-01-12  
Consultant: Mr Daniel Achebe, Consultant General Surgeon

### REASON FOR ADMISSION

Acute right iliac fossa pain of 18 hours duration with associated nausea and low grade fever.

### DIAGNOSIS

Acute appendicitis, uncomplicated.

### PROCEDURE

Laparoscopic appendicectomy performed 2026-01-09 under general anaesthetic. Findings: inflamed appendix, no perforation, no free fluid. Histology confirmed acute appendicitis with no evidence of malignancy.

### POST-OPERATIVE COURSE

Uneventful. Mobilised on day one. Tolerating diet from day two. Apyrexial from day two onwards. Wounds clean and dry at discharge.

### MEDICATION ON DISCHARGE

Paracetamol 1 g four times daily as required  
Ibuprofen 400 mg three times daily as required, with food

### FOLLOW UP

No routine surgical follow up required. Histology already reviewed. Sutures are dissolvable. Patient advised to avoid heavy lifting for two weeks and to contact the ward if the wound becomes red or discharging.

Summary prepared by Dr Leah Mbeki, Foundation Year 2, 2026-01-12.
